Instructions

1. Ensure you've followed the lessons to set up your Github, git, and VS Code
2. Fill in the below tasks (note it'll save as you go)
3. Once everything is filled in, ensure you click "Submit and Export PDF"
4. Upload the PDF to Github in a `Module1` folder
5. Find the downloaded PDF and move it into the location of your local repository folder (don't use the Github upload option as we want to practice the git commands)
6. Use `git add .` to track all file changes (i.e., the PDF)
7. Use `git commit -m "Uploading M1 PDF"` to record the change and provide a meaningful message
8. Use `git push origin main` to move the changes to the remote repository's `main` branch (Note: Future assignments will have a dedicated branch name for their work)
9. Take the same PDF and upload it to the Canvas submission

Section #1: (10 pts.) Tasks

## Task #1 (0.00 / 2.22 pts.) - Screenshot of VS Code Extensions for t

Weight: *22.22%*

Objective: *Screenshot of VS Code Extensions for this class*

Task #5 (0.00 / 2.22 pts.) - Reflection

Weight: *22.22%*
Objective: *Reflection*

Details:

- Did you have any issues/problems this module? If so, what were they and how did you solve them?
- Did you learn anything new this module? If so, provide some brief details.
- If both answers were no, briefly explain your prior background.

Text Prompt

Your Response:

In this module, I learned how to update the Java version. I tried the Java installer, but it didn't work, so I downloaded the package and modified the path through the edit system environment. I didn't have any problems in this module.
